

High-security  
doors for modular  
vault rooms

# Centurion Vault Door

BURGLARY-RESISTANT PROTECTION

## Key Features

- Every grade of Centurion vault door has been independently tested by ECB•S and awarded the EN 1143-1 certification for burglary resistance.
- The doors are designed for integration with Centurion vault room panels and constructed to the same standards.
- The vault doors have undergone additional testing for resistance to explosives and grades IX–XII also resist attack from diamond core drill bits (optional extras).
- The door frame is armoured to provide extra protection.
- Locking options include one key lock and combination lock as standard and a high-security electronic lock as an option.
- Centurion vault doors can be fitted with a grille gate providing added security for the main door. The grille gate is accessed via a high-security lock and can be opened manually or automatically.
- The door is designed to accommodate an alarm system.

## Product Specifications

Grade	Frame Depth (mm)	Weight (kg)	No. of bolts	Clear Opening (mm)	
				Height	Width
V	230	1500	6	1960	900
V EX	290	1700	6	1960	900
VI	230	1500	6	1960	900
VI EX	290	1700	6	1960	900
VII	230	1500	6	1960	900
VII EX	290	1700	6	1960	900
VIII	290	1700	6	1960	900
VIII EX	290	1700	6	1960	900
IX	290	1700	6	1960	900
IX CD	290	1700	6	1960	900
IX CD EX	290	1700	6	1960	900
X	415	3000	6	1960	900
X CD	415	3000	6	1960	900
X CD EX	415	3000	6	1960	900
XI	415	3000	6	1960	900
XI CD	415	3000	6	1960	900
XI CD EX	415	3000	6	1960	900
XII	415	3500	10	1960	900
XII CD	415	3500	10	1960	900
XII CD EX	415	3500	10	1960	900

CD denotes protection against diamond core drill bits.

EX denotes protection against explosives.

### Testing

Every grade of Centurion vault door has been independently tested by ECB•S and certified in accordance with EN 1143-1, the European standard for burglary protection.

This standard covers attacks from a variety of tools, including crowbars, high-powered disc cutters and oxyacetylene torches.

Centurion vault doors also provide certified protection against explosives (EX classification) and grades IX–XII have been tested to provide resistance against powerful diamond core drill bits (CD classification) (optional extras).

### Lock Options

Grades V–X are fitted with two standard locks – one key lock and one combination lock – whilst grades XI–XII have an additional combination lock as standard. The locks have been designed to match the security levels required by the vault doors.

As an option, Centurion vault doors can be equipped with a high-security electronic lock offering extra functionality such as a time-lock, protected code-entry, a silent alarm and multiple user management.
