Safes that are as individual as their owner.

Royal safes can be as individual as their owner, with a choice of sizes, colour and locking systems. The bespoke interior of each Royal safe is handcrafted in the UK from a choice of premium materials including wood and leather.

The combination of German engineered security and British craftsmanship brings the best of both worlds together to create a secure but uniquely tailored safe to protect cash, valuables and precious items.

## BESPOKE

### LUXURIOUS DIMENSIONS

Royal safes are available in four sizes, offering a generous internal volume from 162 to 588 litres.

### CERTIFIED SECURITY TO INDIVIDUALLY AGREED REQUIREMENTS

A choice of five certified security grades are available. These meet strict European standards ensuring all Royal safes are insurance approved, whatever level of security is required. BURG-WÄCHTER safes are independently tested and certified in Germany to meet international Eurograde ratings and are recognised by the UK Association of Insurance Surveyors providing ease of insurance continuity.

### CHOICE OF LOCKS

Depending on the grade of safe, one or two locks can be specified. Royal safes are supplied with a choice of key operated locks or electronic combination locks with secure integrated fingerprint

### BRITISH MADE INTERIOR

The interior of a luxury Royal safe is handmade in the UK to each customer's specification. Every element from shelves and drawers, to interior lighting and watch winders can be incorporated, then tailored and finished with the best materials.

### INDIVIDUAL SERVICE

Through the customer consultation process, BURG-WÄCHTER researches the individual requirements for each safe. This information is then transformed into a unique build specification that ensures all the personal requirements are fulfilled.

# CHOICE OF SIZE AND SECURITY GRADE

BURG-WÄCHTER Royal safes are available in four sizes to suit a range of a storage requirements. They also offer five different levels of security. Each grade is tested and certified by an independent third party up to the value of £1 million to reflect the individual situation, risk levels and value of items being stored.

## DIMENSIONS

## SECURITY GRADING

Five security grades offer independently tested and certified up to £1,000,000 of valuable cover.

# PAINT FINISH

The ideal location for a safe is somewhere that is easily accessible and convenient for daily use. Painted to complement décor, a bespoke Royal safe can be positioned in plain sight in any room. Finished to a flawless automotive quality, a choice of 1,625 RAL colours provides many options to make a safe a unique and valuable addition to a property.

EXAMPLES OF RAL COLOURS

Other finishes and designs are available including, custom vinyl graphics, branding and luxurious pearlescent, metallic or matte paint finishes. Simply place a request with a BURG-WÄCHTER consultant.

## LOCK OPTIONS

Royal safes can be fitted with ten different locking configurations. Grade 1 to 3 safes feature a single locking mechanism, whilst grades 4 and 5 require two locks. All BURG-WÄCHTER locks are independently tested and certified to meet the international recognised EN 1300 class B security standard.

### KEY OPERATED

Manufactured in Germany, BURG-WÄCHTER high quality, key-operated locks feature a twin tumbler, ten lever mechanism for a high level of security. Locks can be changed to a new key in just minutes using the in-built resettable mechanism in the event of a key being lost. These market leading locks have an incredible 50 million key differs.

### **ELECTRONIC COMBINATION LOCKS WITH INTEGRATED FINGERSCAN**

Electronic combinations are easy to use and offer even greater security as they avoid the need to carry or hide a key. The advanced lock can accommodate up to ten users, each with their own pin code. The integrated fingersca offers quick and convenient access with the swipe of programmed fingerprints. The backlit LCD display and menu interface ensures simple and easy programming and operation.

# ANATOMY OF A LUXURY SAFE

The interior of a Royal safe can be individually designed. During the consultation every element can be specific so the finished safe fits perfectly into daily life. A bespoke solution can be developed to meet most requirements.

Using only the best materials, each safe is handcrafted in the UK to the highest standards of finish.

Safe shown includes three powered Rapport watch winders, vanity tray and three drawers.

Chrome, silver or gold plated bolt work with leather lined door

Walnut veneer soft close drawers with luxury handles and fitting

Powered automatic Rapport watch winders and integrated LED lighting

# LUXURY STORAGE FOR JEWELLERY AND VALUABLES

## BESPOKE STORAGE

The interior of a BURG-WÄCHTER luxury safe can be designed with all precious items in mind.

Royal safes not only offer insurance approved secure storage, but also a beautifully crafted interior that gives such items the setting they deserve, whilst keeping them in top condition. Luxurious velvet or suede-lined drawers can be specific for the storage of watches and all items of jewellery, however bespoke or unique.

## BEAUTIFULLY PRESENTED

With Royal safes, possessions and collections can be beautifully displayed, even within a highly secure setting. Thanks to the interior illumination, it is a pleasure to review collections and select the right piece for the right occasion.

**BURG  
WÄCHTER**

It is not just expensive items that BURG-WÄCHTER safes are required to protect. Personally prized possessions such as heirlooms, family jewellery and unique items relating to special people or occasions are irreplaceable and need protecting too.

# MAKING SECURITY A PRIORITY

A luxurious safe must first and foremost offer the finest line of defence against theft. All too often, other safe manufacturers compromise the integrity of the safe by prioritising impressive exterior and interior finishes over secure protection. BURG-WÄCHTER is different. The customisation never compromises the security of the safe. The finished product remains certified to the internationally recognised EN 1143-1 standard, verified by independent testing. This way individually crafted and beautiful storage can be achieved in partnership with the highest UK insurance standards of security.

## E 514 ES

Shown with special painting and version ES locking option.

## E 532 E

Shown with special painting and version E locking option.

**Version CS** Resettable key and combination dial lock

**Version ES** Electronic combination with fingerscan and high security key lock

**Version HSS** Two enhanced security twin tumbler key locks with ECB.S class C certification

**Version CC** Two resettable combination dial locks

**Version EE** Two electronic combination locks with fingerscan

# START YOUR JOURNEY TO BETTER SECURITY

A perfect safe is designed in such a way that it becomes part of your daily routine, offering the go-to storage location for the treasured and valued. During the commissioning process it is important to consider the steps below:

## **STEP 1: STORAGE, SIZE & LOCATION**

Creating a list of your most prized and valued items is a good place to start your journey. Don't forget to include those sentimental and irreplaceable items. Consider the size of each item and the amount of storage space they will require now and in the future. Finally decide on the best location to place the safe within the property. Ensure the floor is strong enough to support the weight of the safe and contents within; this may require a site survey.

## **STEP 2: CASH & JEWELLERY VALUE**

The amount of cash and the value of jewellery and valuables stored inside the safe will determine the required security grading. Royal safes are available in five grades, offering insurance approved cover from £10,000 to £100,000 in cash and £100,000 to £1 million in valuables. Insurers can provide guidance on the safe grading required.

## **STEP 3: LOCK CHOICE**

Royal safes are specified with a high quality German manufactured key operated lock as standard and provide a simple and easy method of access. Electronic combination locks with fingersca are ideal for those that do not wish to have a key that can be lost or misplaced. Offering up to ten unique user codes, they are ideal for safes where there is more than one user.

The fingersca sensor provides secure access with a swipe of pre-authorised fingerprints making it the most convenient method of entry to the safe.

## **STEP 4: EXTERIOR FINISH**

The colour and finish of a Royal safe is a personal decision. Consider the room in which it will be placed and the location within that room. Bright and bold, or subtle and discreet?

## **STEP 5: INTERIOR SPECIFICATION AND FINISH**

The interior of the safe should be designed to accommodate all the items that need to be securely stored, whilst presenting them in a manner which is convenient and easy to use. Function aside, the interior of a luxury safe should also be a beautiful place to store prized possessions and provide a space where creativity can roam freely. Like the interior of a luxury car, fine leathers, woods and precious metals can be combined into a truly unique one-of-a-kind interior.

## **DELIVERY & INSTALLATION**

To ensure your Royal safe can be delivered and installed to meet insurance requirements, a site survey may be required at the property. This will ensure suitable access is available at the property and the safe will be located in a position where it can be fixed in place.

The amount of cash and the value of jewellery and valuables stored inside the safe will determine the required security grading.
