Strongrooms—Lightweight

BURTONSAFES
THE SURE DEFENCE

2 Year Warranty | Independently Tested

Low/medium security, modular Strongrooms for domestic situations

Features

- A range of lightweight Strongrooms to suit the demands of domestic and commercial market
- Can be used as a panic room, a large safe in domestic or commercial properties, as re-enforcement for existing walling and as a room to secure ATM's
- Walls are delivered in panels and assembled on site. The panels are small in dimension and therefore easy to transport to site and manoeuvre within the property
- The door can also be delivered in three parts if necessary to aid with installations in confined areas
- The panels and door are constructed from two layers of 2mm steel that are re-enforced and joined together by steel plates
- Increased levels of security can then be offered by filling the panels with re-enforcement bars and/or concrete
- Wall panels can be constructed up to EN1143-1 Grade VI
- The door can be constructed up to EN1143-1 Grade V
- All rooms are custom made to the customer's dimensions
- Can be supplied in 4, 5 or 6 sided versions
- Panels are generally welded together, although for lower security options this is not always necessary
- A special low cost panic room can be supplied in the standard dimensions H2200mm W1500mm D1500mm
- A special panic room version of the door can be supplied with easy to throw bolts on the inside
- Viewing windows with special security glass are available as an optional extra
