

## Signal Blocker

The Sure Defence for Contactless Cards, Keyless Vehicles and Distracted Driving

The global use of signal operated systems such as contactless cards and keyless vehicles have led to the eruption of tech-savvy criminals. Due to criminal manipulation of signals, private information and possessions are more vulnerable than ever to theft. However, the Signal Blocker with specialist RPF™ material blocks all signals from the objects placed inside the pouch thus guaranteeing protection.

- Expertly tested to a 99% success rate
- Blocks GPS tracking
- Double stitched reinforced seams
- Spare pouch

190mm x 115mm

Secured by Design

Police Preferred Specification

The Defender Signal Blocker uses RPF™ to prevent a phone from receiving any calls or alerts, leaving a driver free to fully focus on the road ahead; no notifications, no distractions. The pouch also provides a physical barrier between a driver and their phone as well as protecting against scratches or cracks if a phone is kept in the glovebox.
