

# Connect 330

## Product Information Sheet

Designed specifically for the insurance and fleet sectors, the C330 is a highly-compact and robust device which can easily be fitted by the end user to their vehicle's OBD test port. Its industry-leading compact dimensions ensure that it has the highest vehicle fitment rate of any telematics device – even fitting the Ford Fiesta.

### Insurance Approved

The C330 is approved and used by insurance companies for young driver and usage-based insurance policies. It is quick and easy for the end-user to install.

### Compact and Powerful

Despite its small size, the C330 has a powerful processor which provides precise GPS locations, and communicates over the GPRS network, utilising complex data sets.

### Fully Certified

The C330 is certified and E-Marked; with all the IP, design, development and manufacturing owned by Trakm8 and managed in-house.

### Deep Connectivity

The C330 houses a tri-axis accelerometer, providing detailed information about vehicle activity, driver behaviour and crash analysis. Through CANbus connectivity it also supplies data on vehicle status and health.

## Specifications

### Connectivity

GPS Location Technology  
2G Communications  
Vehicle CANbus Interface

### Weight

22g

### Dimensions

LxWxH:  
24 mm x 47 mm x 22.7 (34.5) mm

### Enclosure

Fire-resistant PVC black casing

### Certification

CE and R&TTE and E-Mark
